

3rd July 2017

Below I'm sending a short report from Neuromedyka Clinic in Żyrardów in Poland.

Jarosław, 41 years old patient with a heel spur.

Mr. Jarek had a very big problem with his leg. He felt a strong pain even he doesn't walk. We did 3 treatments to solve his problem. It took us 4 weeks.

After 1st treatment he doesn't feel significant improvement but he decided to take all treatments. After 2nd treatment he felt much better only pain appears after all day when he walked. I called him today, it is 4 weeks after last treatment and asked him how he is feeling? He said that he doesn't remember that he had any problems with his leg. He feels great.

Regards,
Tomasz Ruszkiewicz
